

## KWIK GRIP

### Description

---

A heat resistant, solvent-based flexible contact adhesive, suitable for bonding both absorbent & non-absorbent surfaces.

### Uses

---

- ▶ Laminated Plastics
  - ▶ Rubber
  - ▶ Leather
  - ▶ Canvas
  - ▶ Cork
  - ▶ Hardboard
  - ▶ Metal
- 

### Technical Features

---

- ▶ Clean dirt and grease from surfaces to be joined. Remove plastic nozzle and pierce diaphragm with sharp object.
  - ▶ Apply to both surfaces and spread evenly. Surfaces should be entirely coated.
  - ▶ When tack free (approx. 20 min) surfaces should be aligned & brought together. Apply light pressure for several seconds.
-
