

WET AREA

Description

A high grade neutral (non-corrosive) cure silicone formulated for superior adhesion to cement (eg. grout)

Uses

- ▶ Ceramic, glazed & porcelain fixtures
 - ▶ Metal, copper and brass fittings
 - ▶ Plastic Laminates
 - ▶ Rubber
 - ▶ Glass
 - ▶ Stainless steel
 - ▶ Concrete and grouts
 - ▶ Many plastics including polystyrene
-

Technical Features

- ▶ Superior adhesion to mortar, grout and metals. As the product does not lift at the edges and adheres so well to cement and grout, dirt, mould and fungus will not become trapped in the silicone, therefore keeping those unsightly black mould spots away.
 - ▶ Superior silicone formulation forms a durable seal which locks out water and which does not shrink when drying
 - ▶ Built in fungicide to inhibit the growth of mould.
 - ▶ Available in a range of colours to suit most wet areas.
 - ▶ Non corrosive neutral cure formula.
 - ▶ Low odour so can be used in any environment without discomfort.
 - ▶ Is easy to clean once it is applied, as it resists moisture, hot cooking oils and steam.
 - ▶ Superior flexibility +/- 25% movement capability & up to 400% elongation or stretch.
-
